# **ORDINANCE**

## **TWO YEAR MASTER OF SCIENCES**

### **IN**

## **ZOOLOGY & GENOMICS**

1. I) the duration of the course leading to the degree Master of Sciences in Zoology & Genomics shall be of two academic years. Each year shall be divided into two semesters. The Examination for the first and the third semesters shall ordinarily be held in the month of December/January and for the second and the fourth semesters in the month of May/June or on such dates as may be fixed by the University.

ii) A supplementary examination for the first and the third semester shall be held along with their regular first and third semester examinations in December/January and for the second and fourth semester examinations along with their regular second and fourth semester examinations which will be held ordinarily during the month of May/June.

iii) A special examination may be held in the month of December/January for candidates who have failed/or failed to appear in fourth semester examination held in May/June.

2. The date of Commencement of examination as well as last date for the receipt of examination forms & fee as fixed by the University, shall be notified by the COE/Registrar at least two weeks before the commencement of the examination in each semester.

3. Examination forms shall be forwarded to the Registrar as per the schedule of the examination to be notified by the COE/Registrar.

4. Admission eligibility in first semester will be as below:

### **(A) ZOOLOGY**

B.Sc. (Hons.) in Zoology/ B.Sc. (Pass) with any three of the subjects, viz., Anthropology, Biochemistry, Biotechnology, Botany, Chemistry, Environmental Science, Fisheries, Genetics,

Geology, Microbiology, and Zoology with atleast 50% marks in aggregate, or, any other examination recognized by M.D. University, Rohtak as equivalent thereto.

=====

**(B) GENOMICS**

B.Sc. (Hons.) in Zoology/Genetics/Forensic Science/Biotechnology or B.Sc. (Pass) with any three of the subjects, viz., Anthropology, Biochemistry, Biotechnology, Botany, Chemistry, Environmental Science, Fisheries, Forensic Science, Genetics, Microbiology, and Zoology with atleast 50% marks in aggregate, or, any other examination recognized by M.D. University, Rohtak as equivalent thereto.

=====

5. (i) There shall be 80% marks for theory and 20% marks for Internal Assessment. The Internal assessment marks will be distributed as according to the following guidelines:

1) One Class Test	10 marks
2) Assignment and Presentation	5 marks
3) Attendance	5 marks
Less than 65%	0 marks
65% to 70%	2 marks
71% to 75%	3 marks
76% to 80%	4 marks
Above 80%	5 marks

If the candidate is awarded Internal Assessment of more than 80%, the concerned teacher will give specific justification for the same, which shall be considered by a committee chaired by the concerned Head of the University Teaching Department.

(ii) The Schedule of class test and presentation of the assignments etc. will be finalized by teacher concerned and shall be notified to the students with intimation of Head of the Department. However, Internal Assessment shall be made by the teacher teaching the concerned paper/subject. A student who fails to appear in the class test

or present the assignment on the scheduled date due to some justified emergency then one more chance may be given to such students.

- (iii) The candidate will have to pass in theory papers and Internal Assessment separately.
  - (iv) The Internal Assessment awards of a candidate who fails in any semester/paper(s) shall be carried forward to the next examination.
  - (v) Candidate(s) who has not obtained pass marks in the Internal Assessment in any paper(s) will be provided an opportunity to appear before the Committee of Examiners, to be constituted by the Head of the concerned Department, to re-assess performance of the candidate (within three months of the declaration of result and receipt of the request of the candidate concerned), corresponding to schedule given for supplementary examinations and the Internal Assessment given by the committee shall be final.
  - (vi) The HOD shall forward the Internal Assessment marks awarded to the students to the Controller of Examinations.
  - (vii) The department will preserve the records on the basis of which the, Internal Assessment awards have been prepared for inspection, if needed by the University up to one month from the date of declaration of the semester examination results.
6. The candidate will be allowed to appear in the first and second semester examination if he/she meets the following requirements:
- (i) Bears a good character.
  - (ii) Has been on the rolls of the Department during the first semester;
  - (iii) Has attended not less than 75% of lectures delivered in theory as well as in practical. Relaxation in shortage of lectures upto 20% will be allowed by head of department on genuine grounds.
  - (iv) Has appeared in the internal assessment in at least 50% of the theory papers of the semester.
7. The third and fourth semester examinations, of the concerned Programme, shall be open to a regular student who:

- (i) Has been on the rolls of the department during the semester preceding the respective semester examination;
  - (ii) has attended not less than 75% of lectures of each paper/course (individually) in the respective semester; failing which he/she will be not be allowed to appear in the paper(s)/course(s) concerned. Relaxation in shortage of lectures upto 20% will be allowed by head of department on genuine grounds
  - (iii) has passed at least 50% of the papers in the preceding semester (semester 1 and 2) examination;
  - (iv) Has not taken any other course during preceeding/setup Semester, if any.
8. A candidate who has been admitted to any semester but fails to attend classes in any paper/course continuously for 15 days will be treated as absent and his/her name will be treated as struck off automatically. He/she will be allowed re-admission by the permission of the concerned authority with or without penalty as admissible.
9. The medium of instruction and examination for all the above mentioned programmes shall be English.
10. The minimum percentage of marks to pass the examination in each semester shall be:-
- a) 35% in each written paper and internal assessment/ practical separately.
  - b) 35% in Dissertation and Viva-Voce separately.
  - c) 40% in the total of each semester examination
- or
- as per rules amended from time to time by the university
11. The amount of examination fee to be paid by the candidate for each semester shall be as per the decision of the University from time to time.
12. (I) A candidate shall be promoted to the next higher semester if he/she passes at least 50% of the papers prescribed in each of the preceding semester examination.

OR

2/3 of the papers of preceding semester examination/s taken together.

Provided that a candidate shall not be allowed to attend classes in any semester unless he/she has fulfilled the above requirements of the previous semester (S).

Provided further that a candidate who has paid dues for the higher class and is dropped for want of fulfillment of any of the above conditions shall not be required to pay the dues again on re-admission after fulfillment of above conditions as per rules amended from time to time by the university.

EXPLANATION: **50% of five papers will be taken as two** and that of seven papers as three and that of nine papers as four under this Clause.

- (ii) A candidate shall have to pass all the four semester examinations within a maximum period of five years of his/her admission to the first semester of 2-Year M.Sc. Zoology/Genomics program failing which he/she will be deemed to be unfit for the programme and however, if the candidate has taken admission in any other course during intervening period, he/she shall not be eligible for admission in next semester.
13. A candidate, who having passed the second semester examination discontinues his studies, for legitimate and justified reasons may be permitted to join third semester within two years of his passing the second semester examination, however, he or she has to file an affidavit that he/she has not taken admission in any other course.
14. (i) The Internal Assessment awards of a candidate who fails in any semester examination shall be carried forward to the next examination.  
(ii) A candidate who has not obtained pass marks in the Internal Assessment for any paper(s) will not be allowed to take examination in the said paper(s) in the relevant semester unless he repeats the course in paper(s) concerned and obtains the minimum pass marks in the Internal Assessment.
15. (i) The topic of the dissertation report and the faculty under which a student will have to complete the **dissertation shall be decided by completely random lottery draw**

**system.** This draw should be held within the first month of the third/concerned applicable semester itself.

(ii) The candidate shall be required to submit two copies of his/her dissertation report. The last date for receipt of dissertation report in the office of the Controller of Examinations shall be 15<sup>th</sup> April. Provided that in exceptional cases, the Vice Chancellor may, on the recommendation of the Head of department, extend the last date of receipt of the Dissertation report with late fee, as prescribed by the University from time to time.

(iii) The written part of Dissertation report shall account for 70% of marks and the viva-voce to be conducted by a duly constituted Board of Examiners for the remaining 30% of marks, as specified in the Scheme of Examinations.

#### **Dissertation Report**

Performance Evaluation Parameter	Score
Writing Quality	15%
Novelty/Scientific Significance of Aim	15%
Project Design	15%
Publication Potential	15%
Aim-Results Concurrence	10%

(iv) The Viva-voce of the Dissertation report shall be conducted by the following board of examiners:

- a) HOD of the concerned department or his/her nominee and internal faculty member or his/her nominee.
- b) One external examiner (out of the panel approved by the PGBOS)

(v) The marks obtained by the candidate for the dissertation report shall be taken into account when he/she appears in any future examination under re-appear clause.

16. (a) The viva-voce, wherever specified in the scheme of examinations shall be conducted by a Board of Examiners consisting of the following members; -

- (I) HOD of the concerned department or his/her nominee and internal faculty member or his/her nominee.

- (II) An External Examiner (out of the panel approved by the PGBOS)
- (b) The marks obtained by the candidate for the viva-voce shall be taken into account when he appears in any future examination under re-appear clause.

17. The practical examination(s) of the courses specified in the scheme of examination shall be conducted by the following Board of Examiners, consisting of two members:
  - (i) One internal faculty member (to be appointed by the HOD) and
  - (ii) One External Examiner (to be appointed on the recommendation of the PG Board of Studies)
18. The students enrolled in department will have the option to select any open elective/program elective paper either in same or in any other department of life science or as per university rule.
19. Notwithstanding the integrated nature of this course which is spread over more than one academic year and the Ordinance in force at time a student joins the course shall hold good only for the examination held during or at the end of the academic year and nothing in this Ordinance shall be deemed to debar the University from amending the Ordinance and the amended Ordinance, if any shall apply to all the students whether old or new.

Zoo-402		Microbial Genetics	CP	4	80
Zoo -403		Biosafety & ethics in science	OE	3	80
Zoo-404		Dissertation		24	200
Zoo-IA-IV		Internal Assessment			20 in each Theory paper
Zoo-LC-IV		Laboratory course		6	100
Zoo-TT		Tutorial I & II		2	-
		<b>Total Marks (Semester IV )</b>			<b>600</b>
	<b>Grand Total</b>			<b>2700</b>	

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-I**

**Course no.: Zoo-101**

**MM: 80**

**Course Title: Biomolecules**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Biomolecular foundations of biology:

pH, pK, acids, bases, buffers, bonds- Van der Waal's, electrostatic, hydrogen bonding and hydrophobic interaction, free energy, resonance, isomerisation.

Structure of soluble biomolecular pool of cells – aminoacids and peptides; monosaccharides, oligosaccharides and polysaccharides; glycoproteins, peptido-glycans; nucleotides, oligonucleotides, lipids and vitamins.

**Unit II**

Proteins Structure -primary, secondary, tertiary and quaternary.

Folding, denaturation and function of polypeptides like Ribonuclease A, Myoglobin, Hemoglobin, Chymotrypsin, Lysozyme and Carboxypeptidase.

Conjugated proteins-structure and functions

Analysis of proteins: Western blotting; Reverse turns and Ramachandran plots

**Unit III**

Nucleic acids: - types, structural organization and helix-coil transition energetics. Physicochemical techniques and macromolecular analysis

Biomolecular interaction: Protein-ligand, protein-protein, nucleic acid-protein and nucleic acid-ligand interactions.

**Unit IV**

Assembly of macromolecular complexes;- Ribosomes, chromatin, plasma membrane and viruses;

Nanoparticles;

Organisation of animal tissues.

**Suggested Reading Material**

1. D.Voet and J.G. Voet. Biochemistry, John Wiley & Sons.
2. D. Freifelder. Physical Biochemistry, W.H. Freeman & Company
3. I.H. Segal. Biochemical Calculations, John Wiley & Sons.
4. T.E. Creighton. Proteins-structure and Molecular Properties, W.H. Freeman & Company.
5. D. Freifelder, Essentials of Molecular Biology.
6. K. Wilson and K.H. Goulding. A Biologist's guide to principles and techniques of practical biochemistry.
7. T.G. Cooper. Tools of Biochemistry.
8. Hawk. Practical Physiological Chemistry.
9. R.H. Garrett and C.M. Grisham. Biochemistry, Saunders College Publishers.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-I**

**Course no.: Zoo-102**

**Course Title: Techniques in Animal Sciences**

**MM: 80**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Microscopy- Principles of light, phase-contrast, fluorescence, scanning and transmission electron microscopy; X-ray diffraction; pH meter; Fixation and staining of the biological materials.

**Units II**

Principles and uses of biophysical methods: colorimeter; spectrophotometer; Spectroscopy: Visible, UV, ORD/CD, ESR, NMR, atomic absorption and plasma emission.

**Unit III**

Principles and applications of tracer techniques in biology; Radiation dosimetry, Radioactive isotopes and half life of isotopes; Effect of radiation on biological system; Autoradiography; Cerenkov radiation; Liquid scintillation spectrometry. Cryopreservation for cells, tissue, organisms Cryotechniques for microscopy Freeze-drying for physiologically active substances

**Unit IV**

Separation techniques in biology  
Molecular separations by gel-filtration, ion-exchange and affinity chromatography, Thin layer and gas chromatography; High pressure liquid (HPLC) chromatography, Electrophoresis and electrofocussing, Ultracentrifugation (velocity and buoyant density).

**Suggested Reading Material**

1. Animal Cell Culture - A practical approach, Ed. John R.W. Masters, IRL Press.
2. Introduction to Instrumental analysis, Robert Braun. McGraw Hill International Editions.
3. Shukla and Upadhyaya. Experimental Science
4. Randhir Singh. Practicals in Biochemistry
5. A Biologists Guide to Principles and Techniques of Practical Biochemistry, K. Wilson & K.H. Goulding, ELBS Edn.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-I**

**Course no.: Zoo -103**  
**Course Title: Animal Cell Biology**

**MM: 80**  
**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Introduction-experimental systems in Cell Biology;  
Structure of pro-and eukaryotic cells;  
Structure and function of cells and intracellular organelles of both prokaryotes and eukaryotes); Significance of intracellular compartments;  
Mechanism of cell division including (mitosis and meiosis) and cell differentiation;  
Cell-cell interaction.

**Unit II**

Biomembranes: Molecular composition and arrangement functional consequences; Model membranes; Liposomes.  
Transport across cell membrane-  
Diffusion, active transport and pumps, uniports, symports and antiports; Membrane potential; Co-transport by symporters or antiporters; Transport across epithelia.  
Cytoskeleton:  
Microfilaments and microtubulus-structure and dynamics; Microtubules and mitosis; Cell movements-intracellular transport, role and kinesin and dynein; Cilia and Flagella

**Unit III**

Cell-Cell signaling:  
Signal transduction mechanisms;  
Cell surface receptors;  
Second messenger system;  
MDP kinase pathways;  
Signalling from plasma membrane to nucleus.  
Cell-Cell matrix, adhesion and communication  
Ca++ dependent & independent homophilic cell-cell adhesion; Gap junctions and connexins  
Cell matrix adhesion: Integrins, Collagen, Non-collagen components & Cellulose fibril synthesis and orientation

**Unit IV**

Cell cycle: Cyclines and cyclin dependent kinases and Regulation of CDK-cycline activity  
Genetic analysis in Cell Biology: Nucleus; Mitochondria and chloroplasts and their genetic organization;  
Biology of cancer, Biology of aging and Apoptosis-definition, mechanism and significance

**Suggested Reading Material**

1. Molecular Cell Biology, J. Darnell, H. Lodish and D. Baltimore Scientific American Book, Inc., USA.
2. Molecular Biology of the Cell, B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts, and J.D. Watson. Garland Publishing Inc., New York.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Course Title: Computer and Biostatistics**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Computer peripherals and hardware description- computer system design, recognition and structure of different components of a computer system and their respective usage. Input/output and storage devices. Introduction of internet. Office application: MS office 2000 including MS word, MS excel and MS power point Overview of Windows XP. Number system and flow charts in computing language. DOS internal and external commands

Generations of programming languages, system and application software; Introduction of programming in BASIC.

**Unit II**

Collection, classification and tabulation of data. Frequency distribution, Diagrammatic and Graphical presentation of statistical data, Sampling techniques. Central tendency, Dispersion, coefficient of variation; Standard error; Confidence limits; Skewness and Kurtosis Measures of Relationship: Correlation, Regression, Non-parametric tests

**UNIT III**

Probability: Approaches to measurement of Probability, Random experiments, sample space, events.

Mathematical definition of probability of an event.

Probability distributions: - Distribution of Binomial, Poisson and Normal Distributions and their properties; (including problems).

**UNIT IV**

Testing of Hypothesis, Chi-square test, 't' and 'f' test. Analysis of variance for one-way classified data, and two-way classified data.

**Suggested Reading Material**

1. Batschelet, E. Introduction to mathematics for life scientists. Springer-Verlag, Berlin.
2. Snedecor, G.W. and W.G. Cochran. Statistical methods. Affiliated East-West Press, New Delhi (Indian ed.).
3. Green, R.H. Sampling design and statistical methods for environmental biologists. John Wiley & Sons, New York.
4. Computer fundamentals: concepts, systems and application by PK Sinha. BPB publications
5. Computer fundamentals (Paperback) by Ashok Arora, Shefali Bansai and Shefali Bansal. Excel Books
6. Discovering computers: fundamentals (paperback) by Gary B. Shelly. Pub: Course technology
7. Discovering computers: fundamentals, 4<sup>th</sup> ed. (Shelly Cashman) (paperback) by Grey B Shelly Thomas J Cashman and Misty E Vermaat. Pub: Course technology
8. Computer fundamentals architecture and organization (paper back) by B Ram. Pub: New age publications (academic)

**Course Title: Communication skills in Life Science**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Scientific and technical writing: Preparation of scientific report, Thinking and planning, Information, ideas, order of writing, Paragraph writing proper use of verb, Nouns, pronouns, tense, use of MS office, excel, powerpoints for preparing a scientific report.

**Unit II**

Scientific presentation: Preparation of presentation, Order of material, Use of web information in presentation, Ethical/copyright issues in presentations, Title, objective, methodology and results presentation, Different ways to make impressive presentations.

**Unit III**

Oral presentations: General gesture for presentations, Speed, loudness, clarity during presentations, use of appropriate vocabulary during presentation, General discussions, scientific presentation, Sharing view and ideas.

**Unit IV**

Use of web to collect specific information, Scientific paper and review writing, Correspondence with editors and reviewers, appropriate citations, copyright and Ethical issues in paper drafting, Acknowledgment, Keywords, Use of appropriate citations, usage of different softwares for manuscript preparation, usage of line-, bar-graphs, charts to describe the results.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester- I**

**Course no.: Zoo-LC-I**

**Course Title : Laboratory Course**

**M.M. : 150**

**Time : 6 Hrs.**

**Tentative list of the proposed experiments**

- To separate and identify sugar by TLC
- To prepare casein from milk
- To plot the calibration curve for protein estimation by Lowry method
- To plot standard curve for estimation of carbohydrate by anthrone method
- Estimation of creatinine in blood
- Colorimetric estimation of DNA and RNA
- Separation and identification of amino acids by paper chromatography
- To study the effect of auxochromes on the absorption properties of chromophore using spectrophotometer
- To study the effect of pH on absorption properties of chromophore using spectrophotometer
- To study effect of solvent polarity on the absorption properties of chromophore using spectrophotometer
- Measurement of H<sup>+</sup> ion concentration in given sample with the help of pH meter
- Apply gravimetric methods to estimate the amount of sulphate in a given sample
- To determine standard plate count out of water, air and soil sample
- Ouchterlony double diffusion (antigen-antibody pattern)
- To analyse the given sample by SDS PAGE
- To perform gel chromatography for analysis of given sample
- Separation of molecules using ion exchange chromatography
- Separation and identification of amino acids by radial chromatography
- To study different stages of mitosis in onion root tips
- To perform protein estimation test with the help of Bradford method
- Estimation of DNA by diphenylamine reaction
- Determination of RNA by orcinol method
- Isolation of DNA of tissue
- Discuss the problems based on central tendency mean, median, mode, geometric mean, range and standard deviation
- Correlation and regression analysis
- Graphical representation of data
- Parametric and non parametric tests
- Study computer hardware and its parts
- Application of MS office in interpretation of biological data
- Programming in BASIC/C
- Biological Data Base assessment tools
- Analysis of biological information by any bioinformatics tool
- Preparation of presentation on suggested topic
- Review writing on suggested topic
- Assessing and compilation of scientific data various parameters
- Microbial culture
- Microbial growth measurement methods
- Aseptic techniques in culture
- Effect of various parameters on culture
- Movements models in early life

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-II**

**Course no.: Zoo -201**

**MM: 80**

**Course Title: Developmental Biology**

**Time: 3hrs**

Note: There shall be nine questions in total. One question is compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

- Animal development:
- Developmental patterns in metazoans
- Development in unicellular eukaryotes
- Molecular basis of spermatogenesis
- Oogenesis

**Unit II**

- Molecular basis of multicellularity:
- Fertilization
- Cleavage types and significance
- Comparative account of Gastrulation
- Fate maps

**Unit III**

- Early vertebrate development:
- Neurulation and ectoderm
- Mesoderm and endoderm
- Cytoplasmic determinants and autonomous cell specification:
- Cell commitment and differentiation
- Cell specification in nematodes
- Germ cell determinants
- Germ cell migration
- Progressive cell - Cell interaction and cell specification fate

**Unit IV**

- Genetics of pattern formation
- Caenorhabditis*: Vulva formation
- Drosophila*:
- Maternal genes and formation of body axis
- Segmentation genes
- Homeotic genes function
- Imaginal disc development
- Vertebrates
- Axes formation and HOX genes
- Limb formation in chick
- Proximate tissue interactions
- Genetics of axis specification in *Drosophila*
- Tetrapod limb and eye development

**Suggested Reading Material**

1. S.F. Gilbert. Developmental Biology. Sinauer Associates Inc., Massachusetts.
2. Ethan Bier. 'The Cold Spring'. Cold Spring Harbor Laboratory Press, New York.
3. Sastry KV and Shukla V. Text Book of Development Zoology, Rastogi Publication, Meerut

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-II**

**Course no.: Zoo-202**

**MM: 80**

**Course Title: Advanced Physiology**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Digestive system:  
Feeding mechanisms and regulation  
Physiology of mammalian ingestion, digestion, absorption, assimilation and egestion;  
Dentition in mammals

**Unit II**

Respiratory system:  
Respiratory organs and respiratory pigments;  
Control of respiration;  
Structure of heart and blood vessel;  
Circulation and composition of body fluids and their regulation;  
Blood coagulation.

**Unit III**

Excretion and osmoregulation:  
Patterns of nitrogen excretion among different animal groups;  
Physiology of excretion;  
Osmoregulation in different mammalian groups;

**Unit IV**

Muscle and Receptor physiology:  
Receptor physiology -  
Mechanoreception  
Photoreception  
Chemoreception  
Equilibrium reception  
Muscles: structure and function;  
Neuromuscular transmission and nerve conduction.

**Suggested Reading Material**

1. Eckert, R. Animal Physiology: Mechanisms and Adaptation. W.H. Freeman and Company, New York.
2. Hochachka, P.W. and Somero, G.N. Biochemical Adaptation. Princeton, New Jersey.
3. Hoar, W.S. General and Comparative Animal Physiology, Prentice Hall of India.

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-II**

**Course no.: Zoo -203**

**MM: 80**

**Course Title: Molecular Biology**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

History and Scope of Molecular Zoology

DNA replication: Prokaryotic and eukaryotic DNA replication, Mechanics of DNA replication, Enzymes and accessory proteins involved in DNA replication

**Unit II**

Transcription: Prokaryotic and Eukaryotic transcription; RNA polymerases; General and specific transcription factors; Regulatory elements and mechanisms of transcription regulation

Post-transcriptional modifications in RNA: 5'-Cap formation; Transcription termination; 3'-end processing and polyadenylation; Splicing, Editing; Nuclear export of mRNA; mRNA stability and Transcriptional and post-transcriptional gene silencing.

**Unit III**

Translation: Prokaryotic and eukaryotic translation; The translational machinery; Mechanisms of initiation, elongation and termination; Regulation of translation; Genetic code and Co- and post-translational modifications of proteins

**Unit IV**

Recombination and repair: Holiday junction, gene FLP/FRT and Cre/lox recombination; RecA and other recombinases and DNA repair mechanisms.

Biomaterials and their significance

**Suggested Reading Material**

1. Molecular Biology of the Gene, J.D. Watson, N.H. Hopkins, J.W. Roberts, J.A. Steitz and A.M. Weiner. The Benjamin/Cummings Pub. Co., Inc., California.
2. Molecular Cell Biology, J. Darnell, H. Lodish and D. Baltimore Scientific American Books, Inc., USA.
3. Molecular Biology of the Cell, B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts and J.D. Watson. Garland Publishing Inc., New York.
4. Gene VI, Benjamin Lewin, Oxford University Press, U.K.
5. Molecular Biology and Biotechnology. A comprehensive desk reference, R.A. Meyers (Ed.), VCH Publishers, Inc., New York.
6. Molecular Cloning: a Laboratory Manual, J. Sambrook, E.F. Fritsch and T. Maniatis, Cold Spring Harbor Laboratory Press, New York.
7. Introduction to Practical Molecular Biology, P.D. Dabre, John Wiley & Sons Ltd., New York.
8. Molecular Biology LabFax, T.A. Brown (Ed.), Bios Scientific Publishers Ltd., Oxford

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-II**

**Course no.: Zoo -204**

**MM: 80**

**Course Title: Cell Function and Metabolic Regulation**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Structure of atoms, molecules and chemical bonds;  
Energy metabolism (concept of free energy); Thermodynamic principles in biology; Energy rich bonds; Weak interactions;  
Coupled reactions and oxidative phosphorylations; Group transfer; Kinetics, dissociation and association constants;  
Biological energy transducers; Bioenergetics and steady-state conditions of living organisms.  
Degradation of palmitic acid, phenylalanine, tryptophan and nucleotides in animals.

**Unit II**

Glycolysis and TCA cycle; Glycogen breakdown and synthesis; Interconversion of hexoses and pentoses.  
Energy metabolism and high energy compounds:  
Redox potentials  
Mitochondrial electron transport chain  
Oxidative phosphorylation

**Unit III**

Storage and utilization of biological energy  
Biosynthesis of triglycerides; Cholesterol; Phospholipids; Prostaglandins; Sterols.  
Biosynthesis of urea, proline, aspartic acid, Uridylic acid, adenylic acid, glucose, glutathione.

**Unit IV**

Classification and nomenclature of enzymes; Regulation of enzymatic activity; Active sites; Coenzymes: Activators and inhibitors, isoenzymes, allosteric enzymes; Ribozyme and abzyme.  
Enzyme Kinetics (negative and positive cooperativity);  
Metabolic engineering;  
Immobilised enzymes and their applications.

**Suggested Reading Material**

1. D. Voet and J.G. Voet. Biochemistry, J. Wiley & Sons.
2. R.L. Foster, Nature of Enzymology.
3. Lodish et al. Molecular Cell Biology.
4. Annual Reviews of Biochemistry.
5. Garrett and Grisham, Biochemistry.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-II**

**Course no.: Zoo-205 (i)**

**MM: 80**

**Course Title: Evolutionary Biology (Programme elective)**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Genetics of speciation and Molecular Evolution:  
Phylogenetic and biological concept of species  
Patterns and mechanisms of reproductive isolation  
Models of speciation (Allopatric, sympatric, parapatric)  
Gene Evolution  
Evolution of gene families

**Unit II**

Origin of theories of life  
Phylogenetic gradualism and punctuated equilibrium  
Major trends in the origin of higher categories  
Micro-and Macro-evolution

**Unit III**

Molecular phylogenetics:  
How to construct phylogenetic trees?  
Phylogenetic inference- Distance methods, parsimony methods.  
Immunological techniques  
Amino acid sequences and phylogeny  
Nucleic acid phylogeny-DNA-DNA hybridizations, Nucleotide sequence comparisons and homologies  
Molecular clocks

**Unit IV**

Metapopulations  
Monitoring natural populations  
Why small populations become extinct?  
Loss of genetic variations  
Conservation of genetic resources

**Suggested Reading Material**

1. Dobzhansky, Th. Genetics and Origin of Species. Columbia University Press.
2. Dobzhansky, Th., F.J. Ayala, G.L. Stebbins and J.M. Valentine. Evolution. Surjeet Publication, Delhi.
3. Futuyama, D.J. Evolutionary Biology, Sinauer Associates, INC Publishers, Dunderland.
4. Haldane, D.L. A Primer of Population Genetics. Sinauer Associates, Inc, Massachusetts.
5. Jha, A.P. Genes and Evolution. John Publication, New Delhi.
6. King, M. Species Evolution-The role of chromosomal change. The Cambridge University Press, Cambridge.
7. Merrel, D.J. Evolution and Genetics. Holt, Rinehart and Winston, Inc.
8. Smith, J.M. Evolutionary Genetics. Oxford University Press, New York.
9. Strikberger, M.W. Evolution. Jones and Bartlett Publishers, Boston London

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester - II**

**Course no : Zoo -205 (ii)**

**MM: 80**

**Course Title: Animal Biotechnology (Programme elective)**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Cell and tissue culture in animals: Media preparation and sterilization; Inoculation and growth monitoring; Biochemical mutants and their use; cell harvesting methods; Primary culture; Cell line; Cell clones; Cell proliferation measurements and Cell viability testing; Micropropagation; Haploidy; Protoplast fusion and somatic hybridization; Cybrides.

**Unit II**

Principles and methods of genetic engineering and Gene targeting; Applications in agriculture, health and industry. Antisense and Ribozyme technology: Molecular mechanisms of antisense molecules; Inhibition of splicing, polyadenylation and translation; Disruption of RNA structure and capping; Biochemistry of ribozyme; hammerhead, hairpin and other ribozymes; Strategies for designing ribozymes; Application of antisense and ribozyme technologies

**Unit III**

Biochemistry and molecular biology of cancer; Genetic and metabolic disorders; Hormonal imbalances. Drug metabolism and detoxification; Genetic load and genetic counseling. Gene transfer methods in animals; Transgenic biology; Allopheny; Hybridoma technology.

**Unit IV**

Industrial processes: Production of organic acids, amino acids, proteins, antibiotics and pharmaceuticals  
Bioreactors: designing and operation  
An introduction to Genomics, Proteomics, Computational Biology, Biosensors, Biofuels & Biopesticides.

**Suggested Reading Material**

1. Brooker, R.J. Genetics: Analysis and Principles. Benjamin/Cummings, Longman Inc.
2. Fairbanks, D.J. and W.R. Anderson. Genetics - The Continuity of Life. Brooks/Cole Publishing Company ITP, NY, Toronto.
3. Griffiths, A.J.F., J.H. Miller, D.T. Suzuki, R.C. Lewontin and W.M. Gelbart. An introduction to genetic analysis. W.H. Freeman and Company, New York.
4. Lewin, B. Genes. VII. Oxford University Press, Oxford, New York, Tokyo.
5. Watson, J.D., N.H. Hopkins, J.W. Roberts, J.A. Steitz and A.M. Weiner. Molecular Biology of Genes. The Benjamin/Cummings Publishing Company Inc., Tokyo.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester- II**

**Course no.: Zoo-LC-II**

**Course Title : Laboratory Course**

**List of the proposed experiments**

**M.M. : 150**

**Time : 6 Hrs.**

- Media preparation and sterilization
- Inoculation and growth monitoring
- Animal tissue culture
- Plasmid isolation
- Restriction digestion
- Ligation
- Genomic DNA extraction
- Analysis of isozymes/ proteins on SDS page
- To dissect out *Drosophila* larvae to prepare the polytene chromosome slide and arm identification
- To prepare the permanent slide of insect larvae and its study
- To dissect out *Drosophila* larvae and to take out the imaginal discs
- To study the effect of temperature on life cycle of *Drosophila melanogaster*
- To study different developmental stages with the help of charts
- To study the effect of varying pH on salivary amylase
- To determine the effects of varying temperatures on the activity of salivary amylase
- To study the rate of respiration by aquatic animals
- To determine the concentration of free CO<sub>2</sub> in variety of given samples
- Determination of dissolved O<sub>2</sub> of given samples by Wrinklers method
- Isolation of monocytes
- To study hematological parameter in blood
- To study the effect of osmolarity of solution on RBC
- To study the knee jerk reflex in man
- To test the urine for urea, proteins, ketones and sugar
- Separation and identification of amino acids by vertical paper chromatography
- Separation and identification of amino acids by radial chromatography
- To separate and identify the sugar by thin layer chromatography
- To perform extraction of nucleic acids
- To perform isolation of DNA
- To separate DNA sample by agarose gel electrophoresis
- To perform western blotting to analyse the given protein sample
- DNA gel extraction
- To determine the protein concentration in the given albumin by Biuret method
- To plot the calibration curve for glucose with the help of spectrophotometer
- Qualitative estimation of salivary amylase
- To investigate the effect of temperature on enzyme catalysed reaction
- To investigate the effect of varying pH on the activity of salivary amylase
- Quantitative estimation of protein, glucose, DNA and RNA
- Purification of carbohydrates/protein /lipids by column chromatography
- To prepare the phylogenetic tree
- To study genetic variability with the help of thumb impression (Dermatography)
- To determine the T<sub>m</sub> of the DNA sample
- To test the genetic variability by PTC test
- To study genetic variability in human population
- To show reproductive isolation in *Drosophila* species
- To perform Immunoelectrophoresis
- To perform Countercurrent Immunoelectrophoresis
- Wild life/ conservation report

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-III**

**Course no.: Zoo-301**

**MM: 80**

**Course Title: Animal diversity of Invertebrates**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Definition and basic concepts of biosystematics and taxonomy  
Species concepts - species category, different species concepts; sub-species and other infra-specific categories.  
Principles and theories of biological classification, hierarchy of categories.

**Unit II**

Classification of Non-chordates (Protozoa to helminthes): Salient Features and classification up to classes with reference to diversity in animal form and function, like:

- |                              |  |
|------------------------------|--|
| i. Habit and habitat         | v. Excretory organs                      |
| ii. Support and Movement     | vi. Sensory system                       |
| iii. Nutrition               | vii. Reproductive patterns               |
| iv. Gas exchange & transport | viii. Development and Larval characters. |

General account: Aquiferous and skeleton system in Porifera; Polymorphism in cnidarians; parasitic adaptations in helminthes; Larval form and their significance.

**Unit III**

Classification of Non-chordates (Arthropoda to Echinodermata): Salient Features and classification up to classes with reference to diversity in animal form and function, like:

- |                              |  |
|------------------------------|--|
| i. Habit and habitat         | v. Excretory organs                      |
| ii. Support and Movement     | vi. Sensory system                       |
| iii. Nutrition               | vii. Reproductive patterns               |
| iv. Gas exchange & transport | viii. Development and Larval characters. |

General account: Larval form and their significance in Arthropoda to Echinodermata; Coelom; Torsion and detorsion in Mollusca; Ambulacral system;

**Unit IV**

Brief accounts of life history, mode of infection and pathogenicity of the following pathogens with reference to man prophylaxis and treatment:

- (a) Pathogenic protozoans: Trypanosoma, Leishmania and Plasmodium.  
(b) Pathogenic helminths: Fasciolopsis, Schistosoma and Wuchereria.

Molecular, cellular and physiological basis of host-parasite interactions i.e. changes in organs.

**List of Recommended Books**

4. Campbell: Biology (Benjamin)
5. Marshall and Williams: Text Book of Zoology
6. Wolfe: Biology the Foundations (Wadsworth)
7. Parker & Haswell: Text Book of Zoology Vol.II (Macmillan)
8. Prescott: Cell (Jones & Bartlett).
9. M.Kato. The Biology of Biodiversity, Springer.
10. J.C. Avise. Molecular Markers, Natural History and Evolution, Chapman & Hall, New York.
11. E.O. Wilson. Biodiversity, Academic Press, Washington.
12. G.G. Simpson. Principle of animal taxonomy, Oxford IBH Publishing Company
13. E. Mayer. Elements of Taxonomy.
14. E.O. Wilson. The Diversity of Life (The College Edition), W.W. Northern & Co.
15. B.K. Tikadar. Threatened Animals of India, ZSI Publication, Calcutta.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-III**

**Course no.: Zoo-302**

**MM: 80**

**Course Title: Molecular Endocrinology**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Definition and scope of endocrinology; Structure of various endocrine glands; Hormones: Classification, structure and function; Ontogeny and phylogeny of endocrine glands.

**Unit II**

Chemical nature of hormones  
Purification and characterization of hormones  
Production of hormones by biochemical and rDNA technologies

**Unit III**

Hormone action and regulation  
Hormone receptors - identification, quantitation purification and physico-chemical properties  
Membrane receptors - structure and signal transduction mechanisms  
G-proteins  
Nuclear receptors - structure and function. Orphan receptors  
Metabolic and developmental hormones

**Unit IV**

Biosynthesis and secretion of hormones  
Biosynthesis of steroid hormones *de novo*.  
Biosynthesis and amino-acid derived small size hormones (eg: T<sub>4</sub>, Epinephrine, etc.).  
Biosynthesis and simple peptide hormones-Pre and Prohormones.  
Neuroendocrine regulation

**Suggested Reading Material**

1. E.J.W. Barrington. General and Comparative Endocrinology, Oxford, Clarendon Press.
2. P.J. Bentley. Comparative Vertebrate Endocrinology. Cambridge University Press.
3. R.H. Williams. Text Book of Endocrinology, W.B. Saunders
4. C.R. Martin. Endocrine Physiology. Oxford Univ. Press.
5. A. Gorbman et al. Comparative Endocrinology, John Wiley & Sons
6. Benjamin Lewin, Genes VII, Oxford University Press.
7. L.P. Freedman. Molecular Biology of Steroid and Nuclear Hormone Receptors, Birkhauser.
8. Guyton. A text Book of Human Physiology
9. G. Litwack. Biochemical Actions of Hormones, Academic Press.

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-III**

**Course no.: Zoo-303**

**MM: 80**

**Course Title: Immunology**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Antigen; Structure and functions of different classes of immunoglobulins; Primary and secondary immune response; Organization and structure of lymphoid organs, Cells of the immune system and their differentiation and Lymphocyte traffic; Innate and Acquired Immunity; Humoral and cell mediated immunity.

**Unit II**

Major Histocompatibility Complex in mouse and HLA system in human: MHC haplotypes, Class I and class II molecules, Cellular distribution, Peptide binding, Expression and diversity and Disease susceptibility and MHC/HLA. Mechanism of immune response and generation of immunological diversity; Genetic control of immune response, Effector mechanisms; Applications of immunological techniques.

**Unit III**

Complement System; Cytokines: Structures and functions, Cytokine receptors and Cytokines and Immune response and Immunological tolerance; Hypersensitivity and immune responses to infection agents especially intracellular parasites.

**Unit IV**

Disorders of immune system, self tolerance and autoimmunity  
Immunosuppression, immunodeficiency involving only B cells, only T cells, Severe combined immunodeficiency (SCID), AIDS  
Primary antigen, antibody reactions, radioimmunoassay, ELISA, secondary antigen-antibody reaction, precipitations and agglutinations, immunoelectrophoresis.

**Suggested Reading Material**

1. Kuby. Immunology, W.H. Freeman, USA.
2. W. Paul. Fundamentals of Immunology.
3. Tolora et al. Microbiology
4. Pelczar. A text book of microbiology
5. I.M. Roitt. Essential Immunology, ELBS Edition.

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**

**Semester-III**

**Course no.: Zoo-304**

**MM: 80**

**Course Title: Molecular Cytogenetics**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Biology of Chromosomes:

Molecular anatomy of eukaryotic chromosomes

Metaphase chromosome: Centromere, Kinetochore, Telomere and its maintenance

Heterochromatin and Euchromatin

Giant chromosomes: Polytene and lampbrush chromosomes.

Sex chromosomes, sex determination and dosage compensation in *C. elegans*, *Drosophila* & Humans

**Unit II**

Imprinting: Genes, chromosomes and genomes.

Cytogenetic implications and consequences of structural changes and numerical alterations of chromosomes.

Human Cytogenetics:

Techniques in human chromosome analysis - molecular cytogenetic approach.

Human Karyotype - banding - nomenclature

Numerical and structural abnormalities of human chromosomes - syndromes.

Mendelian and chromosome based heritable diseases in humans.

**Unit III**

Molecular mapping of genome

Genetic and physical maps

Physical mapping and map-based cloning

Choice of mapping population; Simple sequence repeat loci

Southern and fluorescence *in situ* hybridization, DNA finger printing, Flow cytometry

Automated karyotyping, Chromosome painting for genome analysis

Chromosome microdissection and microcloning

**Unit IV**

Molecular markers in genome analysis:

RFLP, RAPD and AFLP analysis

Molecular markers linked to disease resistance genes

Application of RFLP in forensic, disease prognosis, genetic counseling, pedigree, varietal analysis

Genome analysis - *Humans*, *Drosophila*, yeast, and microbial genomes.

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Concept of evolution: Darwinism and Neo-Darwinism

Hardy-Weinberg law of genetic equilibrium

A detailed account of destabilizing forces: (i) Natural selection (ii) Mutation (iii) Genetic drift (iv) Migration (v) Meiotic drive

**Unit II**

Quantifying genetic variability

Genetic structure of natural populations

Phenotypic variation

Models explaining changes in genetic structure of populations

Factors affecting human disease frequency

Mendelian basis of transmission of disease

**Unit III**

Molecular population genetics

Patterns of change in nucleotide and amino acid sequences

Ecological significance of molecular variations

Emergence of Non-Darwinism-Neutral Hypothesis

**Unit IV**

Genetics of quantitative traits in populations

Analysis of quantitative traits

Quantitative traits and natural selection

Estimation of heritability

Genotype-environment interactions

Inbreeding depression and heterosis

Molecular analysis of quantitative traits

Phenotypic plasticity

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Interactions between environment and biota; Concept and types of ecosystem, Stability and complexity of ecosystems; Productivity and biodegradation in different ecosystems; Limiting factor; food chain and energy flow, productivity and biogeochemical cycles (N<sub>2</sub>, P, C and S); Ecological pyramids and recycling; Community structure and organisation;

**Unit II**

Wild life: Speciation and extinctions; Magnitude and distribution of biodiversity, economic value, wildlife biology, conservation strategies, cryopreservation and sustainable development. Animal trafficking and poaching.

**Unit III**

Environmental pollution. Global environmental change; biodiversity, status, monitoring and documentation; Major drivers of biodiversity change, biodiversity management approach.

Microbiology of water, air, soil and sewage

**Unit IV**

Characteristic of population: population growth curves

Concept of metapopulations: demes and dispersals and interdemic extinctions

Age structured population

Biogeographical realms of India

**Suggested Reading Material**

1. Jorgensen, S.E. Fundamentals of ecological modeling. Elsevier, New York.
2. Lendren, D. Modelling in behavioral ecology. Chapman & Hal, London, UK.
3. Sokal, R.R. and F.J. Rohlf. Biometry. Freeman, San Francisco.
4. Odum : Ecology (Amerind)
5. Odum : Fundamentals of Ecology (W.B. Saunders)
6. Ricklefy : Ecology, (WH Freeman)
7. Turk and Turk : Environmental Science (W.B. Saunders)
8. JP Yadav A text book of Environmental Education, GVS publisher, New Delhi

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester- III**

**Course no.: Zoo-LC-III**

**Course Title : Laboratory Course**

**M.M. : 150**

**Time : 6 Hrs.**

**Tentative list of the proposed experiments**

- To study and classify representative animal specimen belonging to protozoans to echinodermata with charts and available materials.
- To show the dissection of the representative animals like leech, pila and grasshopper for their anatomical studies of various systems with the help of CD.
- To study the microscopic fauna from various samples
- To study the life cycle of parasites
- To prepare the dichotomous key of the Porifera
- To prepare the dichotomous key of the Coelenterata
- To prepare the dichotomous key of the Arthropoda
- To prepare a phylogenetic tree on the basis of taxonomic characteristics of annelida
- To prepare phylogenetic tree on the basis of taxonomic character revealing their heirarchial position of Echinodermata
- To prepare phylogenetic tree on the basis of taxonomic character revealing their heirarchial position of Mollusca
- To identify different endocrine glands with the help of charts
- To study endocrine glands of animals with the help of charts
- To calculate gonadosomatic index
- To study the endocrine glands in the animal with the help of CD and charts
- To study the effect of insulin on glucose concentration
- To demonstrate quantitative human TSH in serum or plasma samples
- To determine dissolved O<sub>2</sub>, free CO<sub>2</sub>, BOD, COD, salinity and hardness content in polluted and control samples
- To study presence of pollutants specific microbes in samples
- To determine physiochemical characteristics of polluted water and soil
- To study concentration of air pollutant with the help of high volume sampler in the air
- To study concentration of air pollutant with the help of personal sampler around the person
- Spirometric analysis of pollution impact and its implications
- Observation of sex chromatin (Barr bodies) in buccal epithelial cells of human female
- To study the effect of UV rays on the *Drosophila melanogaster*
- To analyse the restriction pattern by agarose gel electrophoresis and to map restriction plasmid sites on plasmid DNA
- To prepare ligation lambda/E CORI digest using T<sub>4</sub> DNA ligase and amylase ligated sample by agarose gel electrophoresis
- To study normal human karyotype
- To study chromosomal abnormalities
- To study the various human pedigrees
- Gene mapping by TPT cross
- Study of chromosomes slides (autosomes and sex chromosomes)
- To study primary and secondary sexual characteristics
- To find the blood group of own blood
- To find the Rh factor of own blood group
- To estimate the amount of Hb present in human blood
- To estimate the TLC present in 1mm<sup>3</sup> volume
- Quantitative assay of precipitation
- Rocket immunoelectrophoresis
- Separation of lymphocytes
- Sandwich enzyme linked immunosorbant assay
- Haemagglutination test
- To prepare food material for *Drosophila* culture and maintenance of its population
- To study the genetic variability in human population
- To dissect out the *Drosophila* larva to prepare the polytene chromosome slide
- To identify male and female *Drosophila melanogaster*
- To solve numerical based problems on Hardy Weinberg law
- To study life cycle of *Drosophila melanogaster*
- To demonstrate reproductive isolation in *Drosophila* species in hybridization experiments

**MAHARSHI DAYANAND UNIVERSITY ROHTAK**  
**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-IV**

**Course no.: Zoo-401**

**MM: 80**

**Course Title: Animal diversity of Vertebrates**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Taxonomic keys-different kinds of taxonomic keys, their merits and demerits.  
Process of typification and different Zoological types.  
International code of Zoological Nomenclature (ICZN) - its operative principles, interpretation and application of important rules, Zoological nomenclature; formation of scientific names of various taxa.

**Unit II**

Trends in biosystematics:  
Chemotaxonomy  
Cytotaxonomy  
Molecular taxonomy  
Taxonomic procedures-taxonomic collections, preservation, curation process of identification.  
Taxonomic characters: different kinds and their significance  
Systematic publications: - different kinds of publications.

**Unit III**

Principles of classification  
Classification of Chordates (Hemi-chordates to amphibians): Salient Features and classification up to classes with reference to diversity in animal form and function, like:  
Habit and habitat, Support and Movement, Nutrition  
Gas exchange & transport  
Excretory organs Sensory system Reproductive patterns Development and Larval characters  
General account: Dipnoi; Migration of fishes; Parental care in fishes and amphibians;

**Unit IV**

Principles of classification  
Classification of Chordates (reptilians to mammals): Salient Features and classification up to classes with reference to diversity in animal form and function, like:  
Habit and habitat, Support and Movement, Nutrition  
Gas exchange & transport, Excretory organs,  
Sensory system, Reproductive patterns  
Development and Larval characters.  
Flight adaptation in birds;  
Migration of birds. Evolution of  
Horse and man.

**Suggested Reading:**

1. Boolotian and Stiles: College Zoology (Macmillan)
2. Campbell: Biology (Benjamin)
3. Marshall and Williams: Text Book of Zoology
4. Wolfe: Biology the Foundations (Wadsworth)
5. Parker & Haswell: Text Book of Zoology Vol.II (Macmillan)
6. Prescott: Cell (Jones & Bartlett).
7. M.Kato. The Biology of Biodiversity, Springer.
8. J.C. Avice. Molecular Markers, Natural History and Evolution, Chapman & Hall, New York.
9. E.O. Wilson. Biodiversity, Academic Press, Washington.
10. G.G. Simpson. Principle of animal taxonomy, Oxford IBH Publishing Company.
11. E. Mayer. Elements of Taxonomy.
12. E.O. Wilson. The Diversity of Life (The College Edition), W.W. Northern & Co.
13. B.K. Tikadar. Threatened Animals of India, ZSI Publication, Calcutta.

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-IV**

**Course no.: Zoo-402**

**MM: 80**

**Course Title: Microbial Genetics**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Structure, classification, reproduction and physiology of bacteria, viruses and protozoa (a general accounts only).

Bacteria: transformation, transduction, conjugation and Bacterial chromosome.

Bacteriophages: Types, structure and morphology of T<sub>4</sub> phage.

**Unit II**

Somatic cell genetics

Cell fusion, cybrids and hybrids - agents and mechanism of fusion

Heterokaryon - Selecting hybrids and chromosome segregation Radiation

hybrids, hybrid panels and gene mapping

Cytogenetic effects of ionising and non-ionising radiations.

**Unit III**

Regulation of gene expression in prokaryotes and eukaryotes; Attenuation and antitermination; Operon concept; DNA methylation; Heterochromatization; Regulatory sequences and transacting factors.

**Unit IV**

Genome analysis

C-value paradox, detailed account of various models of prokaryotic genomes, viral genome and organization of genes in organelle genomes.

Transposable elements in prokaryotes and eukaryotes. Role of transposable elements in genetic regulation. Gene therapy

**Suggested Reading Material**

1. Atherly, A.G., J.R. Girtton and J.F. McDonald. The Science of Genetics. Saunders College Publishing, Harcourt Brace College Publishers, NY.
2. Brooker, R.J. Genetics: Analysis and Principles. Benjamin/Cummings, Longman Inc.
3. Fairbanks, D.J. and W.R. Anderson. Genetics - The Continuity of Life. Brooks/Cole Publishing Company ITP, NY, Toronto.
4. Gardner, E.J., M.J. Simmons and D.P. Snustad. Principles of Genetics. John Wiley and Sons. Inc., NY.
5. Totoro et al. Microbiology
6. Griffiths, A.J.F., J.H. Miller, D.T. Suzuki, R.C. Lewontin and W.M. Gelbart. An introduction to genetic analysis. W.H. Freeman and Company, New York.
7. Lewin, B. Genes. VI. Oxford University Press, Oxford, New York, Tokyo.
8. Pelczar. A text book of microbiology
9. Snustad, D.P. and M.J. Simmons. Principles of Genetics. John Wiley and Sons. Inc., NY.
10. Watson, J.D., N.H. Hopkins, J.W. Roberts, J.A. Steitz and A.M. Weiner. Molecular Biology of Genes. The Benjamin/Cummings Publishing Company Inc., Tokyo.

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester-IV**

**Course no.: Zoo-403**

**MM: 80**

**Course Title: Biosafety & ethics in science**

**Time: 3hrs**

Note: There shall be nine questions in total. One question will be compulsory (short answer type) covering the entire syllabus and remaining eight questions will be set two from each unit. Students are required to attempt one from each unit.

**Unit I**

Properties of Radiation, Mechanism of Radioactive Decay, Beta & Gamma emission, Interactions of beta and gamma radiation with matter, electron capture, Decay schemes and energy level diagrams. The laws of Radioactive Decay. Physical, biological and effective half lives, Radionuclide hazards.

**Unit II**

Radiation measurement – monitoring, Personal monitoring: TLD's film. Contamination monitoring: Survey instruments, wipe tests, Accidents and emergencies, Spills & Personnel contamination.

**Unit III**

Medical emergencies: including death of patient, Loss of radioactive sources. Internal exposure – contamination control; External exposure – shielding, distance, time; Safe handling of radioactive sources. Activity in body fluids – urine, blood, breast, milk, etc.

**Unit IV**

Ethical: somatic and germ line gene therapy, clinical trials, the right to information, ethics committee function. Biosafety containment facilities, biohazards, genetically modified organisms (GMOs), living modified organisms (LMOs)

**Suggested Readings:-**

1. Radioisotope Gauges for Industrial Process Measurements (Measurement Science and Technology) by Geir Anton Johansen and Peter Jackson (Jul 26, 2004).
2. Radioisotope Laboratory Techniques by R. A. Faires, etc. and G. G. J. Boswell (Dec 1980).
3. Radiotherapy in Practice: Radioisotope Therapy by Peter J. Hoskin (Mar 22, 2007).
4. Radioisotopes in Biology (Practical Approach Series) by Robert J. Slater (Feb 1, 2002).
5. Clinical Use of Radioisotopes by William Beierwaltes (1957).
6. Biological Safety: Principles And Practices (Biological Safety: Principles & Practices) by Diane O., Ph.D. Fleming and Debra Long Hunt (Aug 30, 2006).
7. Biosafety in the Laboratory: Prudent Practices for Handling and Disposal of Infectious Materials by National Research Council (U. S.) (Dec 1989).
8. Genetically Modified Organisms: A Guide to Biosafety (Cabi) by George T Tzotzos (May 1995).
9. Biotechnology, Biosafety, and Biodiversity: Scientific and Ethical Issues for Sustainable Development by Sivramiah Shantharam, Jane F. Montgomery and Satellite Symposium on Biotechnology and Biodiversity (Apr 1999).

**DEPARTMENT OF ZOOLOGY**  
**M. Sc. ZOOLOGY w.e.f. session 2011**  
**Semester- IV**

**Course no.: Zoo-LC-IV**

**Course Title : Laboratory Course**

**M.M. : 150**

**Time : 6 Hrs.**

**Tentative list of the proposed experiments**

- Study and classify specimen up to order of various phyla of vertebrates with the help of charts
- To show the dissection of the representative animals like herdmania, scoliodon, rat and lizard, for their anatomical studies of various systems with the help of CD.
- Study of accessories bladders in fishes with the help of CD
- Economic note on specific animal
- To prepare the taxonomic key on the basis of given characteristics
- To study distribution patterns of different species by random sampling method
- Microbiological studies of various samples
- To study microbes as bioindicators
- Gene mapping
- DNA and RNA estimation
- To perform transformation
- Effect of ultraviolet light on *E. coli* culture
- Utilisation of microscope for assessing population in fresh water and other samples
- Counting of bacteria by using culture media and standard plate count method
- Environment impact assessment report of various hazardous materials
- Project report on
  - a. Radioactivity: hazards, disposal and precautions
  - b. Biosafety: Incineration etc

**Note:** Besides these any other additional experiment relevant to the syllabi in all semesters or as feasible depending on resources.
